The General Manager,
Madhvani Group & Companies.
P.O.Box 54
JINJA-UGANDA.

Dear Sir,

**RE: REQUEST FOR PARTNERSHIP FOR A SELF-HELP, SELF-SUPPORTIVE AND
SUSTANABLE MIDDLE INCOME PROJECT FOR CRISIS MANAGEMENT**

We the members of You are Uganda, an enterprise registered with **URSB** with Reg. No, based in Uganda, found in Busoga, with its offices in Jinja City, do hereby submit in our concept for your support and Partnership for the above mentioned program, we would like to share our Pro-to-type for our social responsibility to our community.

General Overview:

This concept presents the Social-economic Situation after the Covid-19 Pandemic which Set in the Inflation; Many people lost their Jobs, Salaries reduced, Businesses failing by high taxes and hiked Prices on good, thus setting in a great scourge of **Unemployment and Poverty**, people are finding it so hard to restore their Business and to provide for their households even the basic needs like Foods, Clothes, Medical Care, Transport to different destinations and to some, rent for their houses, business premises, thus setting in a great scourge of poverty, Unemployment and underpayment which places the country at a great risk of Bankruptcy and leading to increase in Crimes like; Domestic Violence, Child Neglect, Moral Decay that may lead People to Gang Violence, Recruitment Activities for Survival, increase in Mental condition or death.

Challenge:

Decreased Consumption

- This Crisis was realized after the Covid-19 pandemic where customers who used to purchase dozens of commodities for home consumption, can now purchase only a few pieces, leading to crumbling economy the world over,

Where the **Manufacturer** is looking for the Market (**Consumer**) yet the **Consumer** lacks the **Purchasing Power**; Much as the Manufacturer needs the consumer, the consumer too needs the manufacturer, but because of the crumbling economy, Many people's lives have come to a **Financial Fork** and are finding it so hard to sustain their households.

The one who used to buy 6kgs of Sugar, 3 bars of 1kg Soap, 3 litres of Cooking Oil, and other commodities, for their household per week, now can only afford half way the budget, cutting off other necessities, because of the crumbled business world unknowingly, that each one

commodity has a health benefit to a healthy living the body needs. It's the health person that is productive than the unhealthy, all these and more others are essentials to life.

- Sugar,
- Fats
- Soap
- Clothes, to mention but a few.

Significance of The Program

The world around us is changing at an ever-increasing pace. Nowhere is this more apparent than in our Economy and reflecting in our Jobs and in our lives, it has caused many changes in our Economy and Investment Landscape, the world over, in which the investor operates has changed so dramatically, Thus, conscious of these prevailing cycles of events, we desire a Participatory Methodology with various Development Partners to confront these challenges and to Save ourselves from the upcoming Market Crash by the Global Economic Melt that has affected us so much and still raging.

We have come up with an innovation called “**(SAWA)**” **Saving Afrika** with **Afrika** that will be a **Self-help, Self-Supportive** and **Self-Sustainable** Micro-Enterprises Connectivity and Impactful Platform.

To mitigate a safe and secure platform where a life changing income can be built-fast for the Traders with their small start-ups helping them generate the cash-flow they need to finally achieve their financial dreams.

We want to tackle issues that stifle small business, for lack of Visibility, unreliable sales and isolation because most existing markets are either too expensive for start-ups or not welcoming to young creative. It is important to note that a sick individual is unable to be productive despite their commitment to their role or duties because of the life existing challenges. Their lives have been ravaged by widespread ignorance coupled with Poverty.

If people are to carry out their responsibilities with optimum output there is need to address these problems to avail the needed funds that everyone needs to be able to overcome the financial halt they have come to, in order to live a healthy, hunger free and financial independent lives.

Mission

- To mitigate a System that bridges the gap between the **Manufacturer**, the **Local Trader**, **passionate Start-Ups** and the **Consumer** they need.

Vision

- To develop their
 - ◇ Capital and their knowledge about business,
 - ◇ Grow their Capital
 - ◇ Sustain their capital and increase their Tax-base so that they can become self-supportive.

Project Goal Description

- To Respond to the World's **Outcry** for **Sustainable Development Goals** and **Innovations**, to fight against **Ignorance Disease** and **Poverty** for our Socio-Economic Development, without looking for funds elsewhere. **It is with "Us and by Us"!!!!!!**

Specific Objectives

- To act as act as a Network that Adopts Common Strategies for Mutual Concerns to our Members.
- To be a general forum or combination of inter-related Entrepreneurial segments, with Sustainable Traders' Cooperative solutions in order to increase production to meet their satisfactory order.
- To be the platform for connection, growth empowerment and rewriting the story of businesses in Busoga and Uganda at large.
- To be the Platform where Entrepreneurs who work in isolation will now find themselves thriving, gaining more Exposure, Customers, creating Markets, collaborators and confidence with the aim of generating medium to scale sustainably, purposefully.

Target Group:

- Our main concern are the Women in Business, more especially the Single mothers, Widows and youth with uncertain fathers with passionate start-ups.
- Our System Starts by Creating a monthly income Stream that is big enough to:
 - ❖ **Reduce the anxiety of Day to day Living Costs.**
 - ❖ **Pay Our Debts and Taxes to avoid being Ripped off.**
 - ❖ **Anxiety of Fear for Losing our Businesses, Property and Dreams.**
 - ❖ **Sustain Our Household and much more.**

We have organized many Entrepreneurial Empowerment and Networking workshops and still are:

A Traders' Capacity Building Empowerment Workshop.

An Empowered Trader and Consumer Now able to purchase.

We believe that our Innovation is Unique, Different, Creative, Reliable, Stress-free, so effective and a Fast-Financial Management System that needs immediate attention and Support.

The hope of its approval will highly be appreciated.

We look forward to working with you.

Thanks.

Yours faithfully,

Nanyika
